

SPUN ALUMINUM BREATHER VENT INSTALLATION INSTRUCTIONS

Important: Read Instructions Before Installation.

4" BREATHER VENT

1. Determine the size of the opening at the bottom of the flashing. Cut a hole in roof deck to match.
2. If installing on an existing roof, remove any debris or materials that may prevent the Breather Vent flange from laying flush against the deck.
3. Place the Breather Vent on the roof deck ensuring that metal flange is flush with roof surface. The flashing flange must be secured to the roof deck using a minimum of 4 round head fasteners into solid substrate. Fastening evenly spaced, 1" from edge of flange, is optimal.
4. Follow roofing system manufacturer's installation instructions for installing and flashing roofing material to the Breather Vent.
5. Adhere to installation requirements as determined by the regulatory authorities for your region.

8" AND 12" BREATHER VENTS

1. Determine the size of the opening at the bottom of the flashing. Cut a hole in roof deck to match.
2. If installing on an existing roof, remove any debris or materials that may prevent the Breather Vent flange from laying flush against the deck.
3. Remove lid from Breather Vent.
4. Place the Breather Vent on the roof deck ensuring that metal flange is flush with roof surface. The flashing flange must be secured to the roof deck using a minimum of 4 round head fasteners into solid substrate. Fastening evenly spaced, 1" from edge of flange, is optimal.
5. Follow roofing system manufacturer's installation instructions when installing and flashing roofing material to the Breather Vent.
6. Place lid on the vent and secure with rivets.
7. Adhere to installation requirements as determined by the regulatory authorities for your region.
